

# Naloxone Master

# Trainer Course

Montana Department of Public Health and Human Services Approved Training

**Why is there a need for Naloxone Master Trainer?**

**TO HELP SAVE LIVES!!**

Every Day in our country **174 people die from a drug overdose-over half of those deaths are opioid related**; this equates to **1218 PEOPLE EVERY WEEK!!** In response to the opioid epidemic, HB333 was passed into law as the Help Save Lives from Overdose Act. This act extends liability protections to public safety, firefighters, school nurses and any person who takes this class when administering Naloxone to a suspected overdose in the course of their duties. Naloxone Master Trainer led training fulfills the DPHHS approved training requirement of the Act. Best practice Medicine has contracted with DPHHS to provide FREE training to the Naloxone Master Trainer. The Goal of Master Trainers is to TEACH others to administer Naloxone.

**PART ONE:**\*must be completed prior to classroom training: 30-90 Minute On-Line learning Module  
Portal: [narcan.bestpracticemedicine.com](http://narcan.bestpracticemedicine.com)
